

POPULATION : MINNESOTA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Minnesota gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for the three cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of cities of more than 50,000.

A series of summary tables (numbered 1 to 15) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Minnesota, 575,081, or 27.7 per cent, are native whites of native parentage; 941,136, or 45.4 per cent, are native whites of foreign or mixed parentage; and 543,010, or 26.2 per cent, are foreign-born whites. The corresponding percentages in 1900 were 24.3, 46, and 28.8, respectively, the proportion of native whites of native parentage having increased during the decade. The percentage of Indians is 0.4; of negroes, 0.3. In only 1 of the 86 counties is the percentage of foreign-born whites less than 15; in 56 counties it ranges from 15 to 25; in 22 counties from 25 to 35; and in 7 counties exceeds 35. In 35 counties the proportion of native whites of foreign or mixed parentage exceeds one-half. (See maps on page 32.)

Of the urban population, 29.2 per cent are native whites of native parentage; of the rural, 26.7 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 41.1 and 48.2 per cent, respectively. The percentage of foreign-born whites is 28.8 in the urban population and 24.3 in the rural. The negro population is almost entirely urban, and the Indian population almost entirely rural.

Sex (Table 2).—In the total population of the state there are 1,108,511 males and 967,197 females, or 114.6 males to 100 females. In 1900 the ratio was 113.9 to 100. Among native whites the ratio is 105.7 to 100 and among foreign-born whites 144. In the urban population there are 112.5 males to 100 females, and in the rural, 116.1.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—73.2 per cent were born in Minnesota and 26.8 per cent outside the state; of the native white population, 26.7 per cent were born outside the state; of the native negro, 77.4 per cent; and of the native Indian, 5.7 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of Minnesota, persons

POPULATION—MINNESOTA.

born in Sweden represent 22.5 per cent; Germany, 20.2; Norway, 19.4; Canada, 7.5; Austria, 6.8; Finland, 4.9; Russia, 3.2; Denmark, 3; Ireland, 2.9; England, 2.2; all other countries, 7.4. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 26.7 per cent; Norway, 18.8; Sweden, 18.1; Canada, 7.5; Austria, 5.1; Ireland, 4.9; Finland, 3; Denmark, 2.5; England, 2.5; Russia, 2.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 642,669, representing 31 per cent of the population. Of such males, 21.1 per cent are native whites of native parentage, 31.6 per cent native whites of foreign or mixed parentage, 46.4 per cent foreign-born whites, 0.5 per cent negroes, and 0.3 per cent Indians. Of the 298,282 foreign-born white males of voting age, 179,187, or 60.1 per cent, are naturalized. Males of militia age—18 to 44—number 491,113.

Age (Tables 7, 8, and 13).—Of the total population, 10.9 per cent are under 5 years of age, 20.9 per cent from 5 to 14 years, inclusive, 20.8 per cent from 15 to 24, 28.6 per cent from 25 to 44, and 18.4 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 3.2 per cent of this class being under 15 years of age, while more than five-sixths (85.3 per cent) are 25 years of age and over. Of the native whites of foreign or mixed parentage, less than one-third (32.5 per cent) are 25 and over, and of the native whites of native parentage approximately the same proportion (34.7 per cent).

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 33.8 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 25 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 648,775, of whom 443,761, or 68.4 per cent, attended school. In addition to these, 9,463 children under 6 and 9,643 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 68.1; for girls, 68.7. For children from 6 to 14 years, inclusive, the percentage attending school was 88.8. The percentage for children of this age among native whites of native parentage was 88.8; among native whites of foreign or mixed parentage, 89.2; among foreign-born whites, 86; among negroes, 90; and among Indians, 77.8. (See Table I.) There is little difference between urban and rural communities as regards the percentage of school attendance for the ages from 6 to 14, but of persons from 15 to 20 years, inclusive, 34.7 per cent in the urban population, as against 39.6 per cent in the rural, were reported as attending school.

Illiteracy (Table 10).—There are 49,336 illiterates in the state, representing 3 per cent of the total population 10 years of age and over, as compared with 4.1 per cent in 1900. The percentage of illiteracy is 7.6

among foreign-born whites, 3.4 among negroes, 0.5 among native whites, and 40.2 among Indians.

For all classes combined, the percentage of illiterates is slightly higher in rural than in urban communities. For each class separately, also, the rural percentage exceeds the urban, the difference being slight except in the case of the negroes and Indians.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is very slight, only 0.7. (See Table I.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over 46.8 per cent of the males are single and 35 per cent of the females. The percentage married is 48.3 for males and 56.2 for females; and the percentage widowed 3.8 and 8, respectively. The percentages of those reported as divorced, 0.4 and 0.5, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due partly to the excess of males in the total population and partly to the fact that women marry younger. Thus 4.3 per cent of the females from 15 to 19 years of age are married, as compared with 0.2 per cent of the males, and 35.5 per cent of the females from 20 to 24 years of age are married, as compared with 11.3 per cent of the males. In the next age group, 25 to 34 years, the percentages are 71.8 and 48.5, respectively; in the age group 35 to 44 they are 83.7 and 73, and among persons of 45 and over the percentage married is higher among the males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 60.4 for males and 71.9 for females; native whites of native parentage, 44.6 and 50.4, respectively; native whites of foreign or mixed parentage, 37.2 and 47; negroes, 44.2 and 56.9; and Indians, 56.1 and 62.1.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, for both sexes, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Minnesota is 380,809, and the total number of families 416,453, there being 109.4 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 5.5, and the average number per family, 5.

 ROSEAU.—Organized from part of Kittson in 1895.
 SWIFT.—Parts of Chippewa and old Lac qui Parle annexed in 1870.
 TRAVERSE.—Part annexed to Big Stone in 1876.

WILKIN.—Part annexed to Otter Tail between 1870 and 1880.

YELLOW MEDICINE.—Organized from part of Redwood in 1872.

NOTE 1.—*Beltrami and Clearwater Counties combined.*—Total population: 1910, 26,207; 1900, including estimated population (317) of part of White Earth Indian Reservation, 11,347; increase, 1900-1910, 14,860; per cent of increase, 131.0. Urban population—1910, 5,099; same places in 1900, 2,183; per cent of increase, 133.6. Rural population—1910, 21,108; same territory in 1900, including estimated population (317) of part of White Earth Indian Reservation, 9,164; per cent of increase, 130.3. Rural population—1900, including estimated population (317) of part of White Earth Indian Reservation, 11,347. Per cent in places of 2,500 or more in 1910, 19.5.

NOTE 2.—Population of Becker County and estimated population (1,514) of that part of White Earth Indian Reservation now in Becker County—1900, 15,889; increase, 1900-1910, 2,951; per cent of increase, 18.6. Rural population—1910, 16,033; same territory in 1900, 15,889; per cent of increase, 1900-1910, 0.9. Rural population—1900, 15,889.

NOTE 3.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make that total comparable with the total for 1890, which does not include the population of Indian reservations. The population thus deducted in the several counties was as follows: Beltrami, 1,513; Carlton, 387; Cass, 2,381; Cook, 108; Itasca, 672; St. Louis, 881.

NOTE 4.—*Itasca and Koochiching Counties combined.*—Total population: 1910, 23,630; 1900, 4,573; increase, 1900-1910, 19,066; per cent of increase, 416.9. Rural population—1910, 23,630; same territory in 1900, 4,573; per cent of increase, 416.9. Rural population—1900, 4,573.

NOTE 5.—*Mahnomen and Norman Counties combined.*—Total population: 1910, 16,695; 1900, including estimated population (1,655) of part of White Earth Indian Reservation, 16,700; decrease, 1900-1910, 5; per cent of decrease, less than one-tenth of 1 per cent. Rural population—1910, 16,695; same territory in 1900, including estimated population (1,655) of part of White Earth Indian Reservation, 16,700; per cent of decrease, less than one-tenth of 1 per cent. Rural population—1900, including estimated population (1,655) of part of White Earth Indian Reservation, 16,700.

NOTE 6.—*Pennington and Red Lake Counties combined.*—Total population: 1910, 15,940; 1900, 12,195; increase, 1900-1910, 3,745; per cent of increase, 30.7. Urban population—1910, 3,714; same places in 1900, 1,819; per cent of increase, 104.2. Rural population—1910, 12,226; same territory in 1900, 10,376; per cent of increase, 17.8. Rural population—1900, 12,195. Per cent in places of 2,500 or more in 1910, 23.3.

INCORPORATED PLACES.

CHISHOLM.—Incorporated in 1901.
